*Think green!*

A new, small and mobile POU system.

This is a brand new drinking water purification system. It is developed in collaboration with advisors from humanitarian organizations and the Norwegian University NMBU.

With Eco Rescue+ you get an astonishingly efficient pumping station, with a reasonable size, weight and price.

Eco Rescue+ provides clean, safe and uncontaminated drinking water. The unit is compact, suitable for any area, any water quality and can deliver purified water for up to 5000 people. The system is ideal for use in any situation where there is an immediate need for high quality drinking water.

Due to an elevated level of performance, this unit delivers up to 1200 liters per hour!

**The Eco Rescue+ system includes:**

Inlet hose with pre-filter, four Eco Rescue filters, detachable tap, outlet hose with tap and a pump needing 230V.

Also available: Eco Rescue Flex!

**Capacity:**

Up to 25 liters per minute. About 125m<sup>3</sup> before replacement of filter cartridges. Purified water will be safe to drink as long as the system delivers water through its filters. Taste, color and odour may appear at an early stage, depending on the quality of the water source (still safe to drink).

**Measurements:**

Frame: H: 51cm, W: 71 cm, D: 41 cm  
With case: H: 60cm, W: 80 cm, D: 50 cm  
Weight: From 36kg
